

AssuredAPI

- Live photo/video delivered directly to your platform
- Our API toolkit makes integration quick and simple
- Compliment your existing in-vehicle hardware or use the camera for GPS too
- Over the air setup, configuration, diagnostics and future firmware updates means lower lifetime engineering costs
- Create Industry leading USPs
- Enhance your customer experience
- Increase ARPU/ACV spend with your new and existing clients
- Improve customer retention

AssuredAPI allows telematics service providers, insurance companies, and other software providers to easily and seamlessly integrate video and data. Our RESTful/JSON API allows service providers to quickly & easily add a video solution to any telematics or fleet management software. AssuredAPI can even be used as a stand-alone GPS tracker + video solution without requiring any additional telematics hardware. Integrated GPS/Glonass and 3-axis G-Sensor enable real-time location tracking and driver behaviour reporting all in a simple windscreen-mounted device.

AssuredAPI utilises local storage on the device and a unique data flow to keep cellular data usage low whilst not restricting access to crucial evidence. AssuredAPI is carrier agnostic and currently can connect to nearly every cellular provider in the world. It also offers an advanced vehicle I/O interface to provide additional driving data and event metrics such as door opening, braking, reverse, vehicle horn, door locks, seatbelt, turn signals & more.

Assured Systems

Assured Systems is a leading technology company with over 1,500 regular clients in 80 countries, deploying over 85,000 systems to a diverse customer base in 12 years of business. We offer high-quality and innovative rugged computing, display, networking and data collection solutions to the embedded, industrial, and digital-out-of-home market sectors.
