INTRODUCTION

Antaira Technologies' STE-6104C-T-V2 is a 4-port industrial gateway between Ethernet (TCP/IP) and serial communications. It allows almost any serial device RS232/422/485 to be connected to a new or existing Ethernet network. The STE-6104C-T-V2 supports server management options such as web based, Telnet, Serial console and Windows Utility. This industrial serial device has an extended operation temperature from -40°C to 85°C and can be mounted with DIN-Rail (included) or wall mount (sold separately). With its high-speed data rates of up to 921kbps, the STE-6104C-T-V2 is an ideal solution for expanding or upgrading serial RS232, RS422, or RS485 devices onto an Ethernet network.
