#### INTRODUCTION

Antaira Technologies' LNX-1600 series is an industrial unmanaged Ethernet switch designed with 16\*10/100 fast Ethernet ports. It is IP30 rated and DIN-Rail mountable making it ideal for applications that demand large port counts in a confined area; such as, power/utility, water wastewater treatment plants, oil/gas/mining, process control automation, security access control systems, intelligent transportation systems, or anywhere an industrial Ethernet switch that need to be enclosed in a confined area.

The LNX-1600 series has a hardened design providing high EFT and ESD protection to prevent any unregulated voltage. It also has a dual power input support of 12~48VDC. There are two wide operating temperature models to support either a -10°C to 65°C or -40°C to 75°C environment.
