## Overview

Cincoze CV-115/P2000 Series is a 15" high performance fanless and jumperless rugged touch panel PC powered by Intel® 6th generation Core™ processor U series, offering more computing power, faster data processing and a 40% boost to graphics performance, while consuming only 15W of power.

The CV-115/P2000 Series supports CFM (Control Function Module) Technology, Cincoze own defined interface with integrated power boost and control signal that allows you to extend PoE and ignition sensing functions with additional CFM boards. In addition Cincoze offers a full series of Mini-PCIe Expansion I/O Card (MEC) for adding extra I/O through the universal bracket. The CV-115/P2000 Series comes with the slim version, and the expandable version (PCI/PCIe card expansion) made with outstanding modular design concept for the greatest flexibility to fulfill the versatile industrial applications.

The CV-115/P2000 Series is a truly rugged computing system supporting wide operating temperature from 0°C to 60°C, wide range DC input from 9V to 48V, and various kinds of industrial protections. Moreover the instant reboot circuit design allows the system to cope with critical power request for factory applications. The CV-115/P2000 Series has an integrated SuperCap to avoid high downtime cost of replacing CMOS battery and be absolutely maintenance-free.

## Highlights

### CDS Technology

CDS (Convertible Display Systems) is patented technology from Cincoze, which is a revolutionary panel PC solution that offers features of modular design, configured on demand, scalability, transformability and Plug & Play.

### CFM Technology

CFM (Control Function Module) is a technology created by Cincoze, it enables function enhancement by adding specific CFM boards. CFM Technology allows CV-100/P2000 Series to support PoE and IGN function for various applications.

### Instant Reboot

The CV-100/P2000 Series supports 0.2 second instant reboot for critical factory application.

### SuperCap

SuperCap is an extremely high volume capacitor, which can be recharged automatically when power is connected (without power Min. 50 days / Max. 70 days), you never need to change CMOS battery, and it makes CV-100/P2000 Series a truly reliable and maintenance-free system.
