Introduction

VDM-101HD is a touch monitor with a wide power input voltage range and operating temperature dedicated to in-vehicle computing. An ideal operating terminal for fleet management and intelligent cockpit applications on commercial vehicles. The panel resolution of 1280 x 800 and typical brightness of 500 nits excel among other 10.1" monitors on the market. SINTRONES' proprietary cable design, which delivers video, audio, touch signal, and power in one cable connection, provides effortless deployment and installation.
