INTRODUCTION

Antaira Technologies' INJ-C201G-bt-T, solve the problem simply by deploying data and power from non-PoE switch and power input to the PD device. PoE injector is a brilliant low-cost solution for the case that only one side of devices is supporting PoE function. Therefore, INJ-C201G-bt-T will be your best choice to deal with the lack of PoE function cases.

Additionally, INJ-C201G-bt-T supports power input from 48VDC to 55VDC, ensuring full 90W PoE output, in compliance with IEEE 802.3bt standard for better usage in various industrial markets, like automation, surveillance and vehicle industry. Besides that, with fan-less design, this model series also works perfectly in polarized temperature from -40~75°C, and undoubtedly becomes your best option in the harsh environment.
