## Introduction

The 17 inch GOT817 is specially designed for food processing applications. Its IP66-rated stainless steel housing protects entire system from damage of water, powder and dust. It also supports a wide operating temperature range from -20°C to +50°C. Thus, this robust unit is best suited for extreme humidity, dusty or wet spaces in food factories or kitchens and more harsh applications.

### Full IP66 and IP69K Certified

The GOT817 adopts a water/dust-proof housing design with five IP66-rated connectors, M12 I/O connectors and IP69K that ensures the product's ability to resist ingress of high temperature and high pressure water. It passed entire system IP66 test by SGS, and verified salt mist test. Additionally, it was tested by a spray nozzle with high temperature water (+80°C), a flow rate of 14 ~ 16 L/min and a nozzle hold with distance 10 ~ 15 cm away from the device at angles of 0°, 30°, 60° and 90° for 30 seconds. The GOT815 is qualified to meet harsh environment applications.

### Wide Temp. (-20°C to +50°C) & Anti-vibration (1G) Design

The GOT817 featuring fanless and noiseless design supports a wide operating temperature range from -20°C to +50°C. Besides, the patent of anti-vibration for SSD ensures system reliability and stability.
